**Refreshments: 5:30—6:00**

**Time: 6:00-8:00 p.m.**

**Date: Dec 1st, 2015**

**Location: Marist College, 3399 North Road, Poughkeepsie, NY 12601, Donnelly Hall, Linux Lab (Rm 258A)**

**Pre-registration NOT required**

In order to train users to not fall for social engineering, we must understand the techniques of it and the conscious and subconscious reasons that individuals are susceptible. We will go into the psychology of social engineering and discuss how our psychological biases and assumptions can be leveraged by social engineers and how to use psychology to develop appropriate training.
